### **Bacteriological Monitoring Requirements Not Met for FCOE Scout Island During 2<sup>nd</sup> Quarter 2025**

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2<sup>nd</sup> Quarter 2025, we did not meet all monitoring requirements for coliform bacteria and therefore cannot be sure of the quality of our drinking water during that time.

#### **What should I do?**

- **You do not need to boil your water or take other corrective actions.**
- The table below lists the contaminant we did not properly test for during 2<sup>nd</sup> Quarter 2025 and how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples will be taken.

<b>Contaminant</b>	<b>Required sampling frequency</b>	<b>Number of samples taken</b>	<b>When all samples should have been taken</b>	<b>When samples will be taken</b>
Coliform bacteria	1/Quarter	0	2 <sup>nd</sup> Quarter 2025	July 10, 2025

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done? *A quarterly coliform bacteria sample was missed in April, 2025.*

Description of corrective action: *We have coordinated with the contracted testing lab to ensure no future samples are missed.*

We anticipate resolving the problem within the estimated time frame: *Issue is resolved*
